

Multi-School Programs for High Schoolers

at Trees For Tomorrow

Program dates, themes and curriculum are pre-set. All that's needed is you and your students! Join other high school groups from around the upper Midwest on Trees For Tomorrow's campus for multi-day, immersive, outdoor learning experiences centered on sustainable management of our natural resources.

Multi-High School Programs are perfect for any teacher who:

- Wants to bring a small group of students (3-12) on a School Outdoor Learning Experience (SOLE) for K-12.
- Wants their students to experience learning alongside other high schools in a small-group setting
- Enjoys the convenience of having a predetermined program theme and class schedule

Sample schedules and additional information at

www.TreesForTomorrow.com

2026-2027 Theme: Forestry*

A progressive and hands-on series of courses that gets students into the field performing forest measurements and assessments. Students put new skills to use as they develop a forest management plan

** Theme rotates each school year*

Choose the dates that work the best for your group

- December 2-5, 2026
- January 27-30, 2027
- April 18-21, 2027

OR create your own date with or without other schools

Other programs are also available

Want to customize your program, have a larger group (12+ students) or K through 9th graders? Our complete program catalog is available online or reach out to Operations Mgr. Mandy Gingerich.
